

CHILD TO ADULT TRANSITION RESEARCH

Dr Kathryn Owler has been asked by the Wilson Home Trust (WHT) to examine transition issues (and gaps) for young people with a disability in the 17-22 age group and their parents e.g. respite and transition housing issues. The WHT are not service providers. However, they are interested in looking at possible ways they can fill any transition gaps. The first step is to talk to young people and their parents. If you have something to say on this issue, Kathryn would really like to have a 30 minute telephone conversation with you. If it is not possible to talk on the phone, she can meet you face to face if you live in the Auckland region. Please email Kathryn if you would like to contribute to this project:
